

SUSTAINABLE AGRICULTURAL SOLUTIONS

Join the Sustainable Agricultural Solutions Summer Course at Ben-Gurion University's Sde Boker campus and gain cutting-edge knowledge in agriculture and environmental sciences while tackling global challenges like food and water management. Connect with an international community and explore innovative sustainable practices in a world-class academic setting.

WHO IS ELIGIBLE TO APPLY?

Registration is open to Bachelor's, Master's and Ph.D. students.

PROGRAM DATES

June 29th - July 24th

TUITION

The program fee of \$2000 includes accommodation, meals, airport transportation, and tuition.

Scholarships are available for eligible students.

COMPREHENSIVE CURRICULUM

The program covers Soil and Atmosphere, Plants Under Stress, Aquaculture, and Precision Agriculture, combining classes, fieldwork, and research to tackle global sustainability challenges.

HANDS-ON EXPERIENCES

A blend of fieldwork and laboratory research ensures students apply their learning in real-world contexts.

CULTURAL AND SOCIAL ENRICHMENT

Balance hands-on learning with exciting field trips across Israel, exploring innovation, history, and nature firsthand.
